FEATURED TALK

YOUR GENES, YOUR HEALTH

Exploring the fascinating world of genomics

Dr. Thushara Priyawansha

Consultant Clinical Geneticist

Pioneer in Paediatric Genomic Medicine in Sri Lanka

Every one of us carries a remarkable blueprint within our DNA – a story that influences who we are, how our bodies function and even our susceptibility to certain diseases. Through genetics and genomic mapping, researchers are uncovering the connections between genes, inherited conditions and human health. Discover how decoding our genetic blueprint is opening new doors to understanding diseases, predicting risks and shaping a future where healthcare can be increasingly personalised.

CELEBRATING OUR GRADUATES

THE FIRST GENERATION

Pioneering graduates of the first Medical Physics batch at the University of Peradeniya share their professional journeys and experiences.

Prof. Sarasanandarajah Sivananthan

Senior Medical Physicist at the
Peter MacCallum Cancer Centre Australia

Mr. Dilip Kumara

Former Chief Medical Physicist at the
Teaching Hospital of Karapitiya

A Celebration of Science, Discovery and Progress
